As an East Fork Volunteer you are an integral part of our community's protection

The East Fork Fire Protection District is searching for people to fill Logistical Firefighter and Support Volunteer positions.

Logistical Firefighter opportunities include driving and operating water tenders, support major incidents by managing equipment needs and self-contained breathing apparatus bottle change out, and equally important, becoming a wildland firefighter. Wildland fire is perhaps our district's biggest threat.

Our Support Volunteer would maintain stations and keep apparatus clean and response ready. We need volunteers who can spread the word of all hazard prevention by teaching general fire safety classes and assess properties for

defensible space, test and maintain our fire hydrants, help with fundraising, and even work in the area of Emergency Management.

JOIN THE EAST FORK FIRE VOLUNTEERS TODAY!

BECOME A COMMUNITY HERO

Support Volunteer

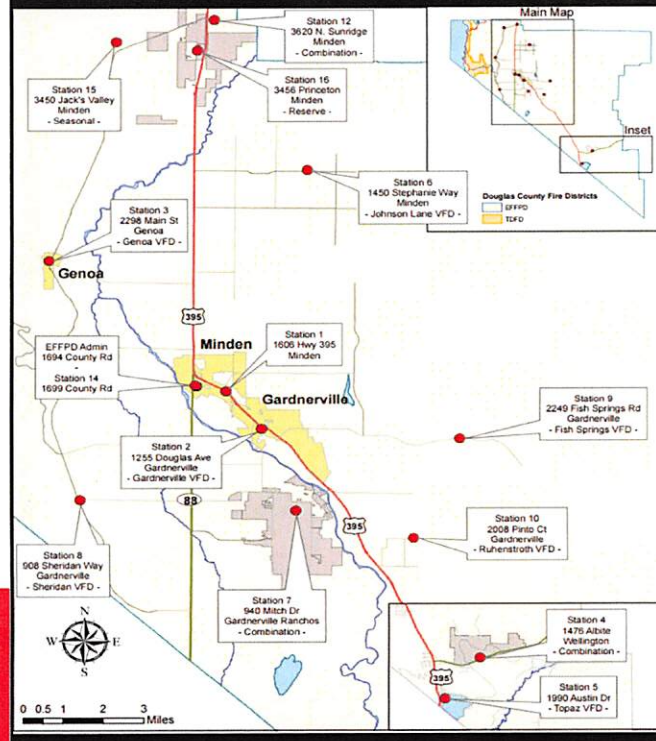

Support Volunteers don't respond to emergencies, yet they are responsible for helping to make sure our stations and equipment are always ready. From training, public outreach and maintenance, Support Volunteers have many critical roles to fill. With minimal training, you can become an integral part of our organization.

Logistics Firefighter

Logistical Firefighters will respond to incidents and serve on the front line at wildland fire incidents. They perform vital water supply operations, support major incident by managing equipment needs and other resource requirements.

OUR DISTRICT & STATIONS

“At work, home or out and about, there is a station nearby for you to respond out of, visit eastforkvol.org today to find out more!”
