March 17, 2005

SUBJ: 2005 National Fire Incident Reporting System (NFIRS), Annual Report for Calendar Year 2004

We are very pleased with the progress that has been made since last year's report. In 1974, the Federal Fire Prevention and Control Act authorized the National Fire Data Reporting Center to gather and analyze information on the magnitude of the Nation's fire problem, as well as its detailed characteristics and trends. The Act further authorized the United States Fire Administration to develop uniform data reporting methods, and to encourage and assist state agencies in developing and reporting data.

The Nevada Department of Public Safety, Division of State Fire Marshal's primary responsibility is fire prevention, based on four core principals. The principals are: Engineering, Education, Enforcement, and Evaluation. Fire data provides the information necessary to learn and analyze the who, what, when, where, and how fires occur. Subsequently, all of the principals are applied to reduce the death and destruction that continues of plague us annually, in the United States.

NFIRS has two primary objectives: 1) to help State and local governments develop fire reporting and provide analysis capability for their own use, and 2) to obtain data that can be used to more accurately assess and subsequently combat the fire problem at the national level.

As I reported in last year's Annual Report, in February 2004, Danny Brennan was added to our staff as the NFIRS Program Manager. Mr. Brennan brought a considerable amount of database experience and has a good understanding of the importance and interpretation of data to accomplish a mission. In calendar year 2003, prior to Mr. Brennan's arrival, 11% of Nevada's fire departments were reporting. At that time there were 14,599 records entered in the system. In calendar year 2004, the number of records entered was 152,933 with 58% of Nevada's fire departments reporting. We are well on-track to meet our goal of having 100% reporting throughout the State. It is only through accurate reporting that we can analyze the fire problem and accomplish our mission.

Thank you for reviewing this report and for understanding the importance of fire prevention to all of Nevada.

Sincerely,

A handwritten signature in black ink that reads "Doyle G. Sutton".
Doyle G. Sutton
State Fire Marshal

Some Words from the Nevada NFIRS Program Officer

WOW! What a great year for the Nevada NFIRS Program and the fire service across the state. We not only increased participation, but exceeded all expectations for 2004. Last year I told you there were 145 reportable departments throughout the state with only a dismal 11% participation rate. After much research and help from various fire agencies we now have a better handle on the actual number of departments and which of the smaller agencies report to whom. According to our findings, there are 72 reportable agencies in Nevada required to report their data to the State Fire Marshal, with 26 currently reporting for a 36% participation rate. Now this may not sound as big a jump in the numbers to you, but there are 163 total departments within those 72 agencies and 95 of them are being reported on. That is over a 58% participation rate and is well over the projections we anticipated for 2004. The National average is 63% and we expect to exceed that in 2005 easily. **Well done Nevada Firefighters!**

I am working diligently with the Nevada Fire Marshal Grants Analyst to ensure all of our departments get what they need through the Federal Assistance to Firefighters and the Fire Prevention programs respectively. So far for the 2004 grant period, Nevada has done well with 13 awards and over \$1.4 million in programs funded.

This years report is the largest and most comprehensive collection of fire statistics for Nevada with over 58% of the states fire departments being represented and 156,414 incidents being reported throughout the state. Even more impressive is the fact that out of those 156,414 incidents 97.77% were accurate and correct which shows the dedication and effort our departments put into this valuable and lifesaving program.

In closing, I would like to thank all those (too many people and agencies to name here) who assisted and directed me in making the 2004 NFIRS reporting year such a great success. I hope everyone finds this data useful and sincerely hope the information prevents fire and saves lives throughout Nevada and the United States in the years to come.

Danny M. Brennan
Nevada State Fire Marshal Office
NFIRS Program Officer

Nevada NFIRS and Federal Assistance to Firefighters Grant Guidelines

State of Nevada Statutes that mandate NFIRS use

NRS 477.030, Duties; powers (State Fire Marshal), paragraph 7

The State Fire Marshal shall put the National Fire Incident Reporting System into effect throughout the state and publish at least annually a summary of data collected under the system.

NAC 477.905 National Fire Incident Reporting System: Reporting requirements. (NRS 477.030)

For the purposes of the National Fire Incident Reporting System to be put into effect throughout this state as required by NRS 477.030:

1. All local fire jurisdictions in this state shall report to the State Fire Marshal such statistics and data required to publish a summary of fire incident information that is compatible with the National Fire Incident Reporting System. Any fire service within this state may obtain a copy of the annual report from the State Fire Marshal at no charge.
2. The State Fire Marshal will report the statistics, which he/she collects pursuant to this section to the National Fire Information Council semiannually. Because the State of Nevada has been designated as an “all-incident reporting state,” local fire jurisdictions shall report their statistics in a timely manner and in accordance with reporting deadlines established by the State Fire Marshal. (**Note: See page 4 of this report for deadlines).
3. A local fire jurisdiction that is facing technical difficulties in providing information pursuant to this section will receive assistance from the State Program Manager for the National Fire Incident Reporting System within the State Fire Marshal division.
4. A local fire jurisdiction may use computer-aided programs in reporting its information if the programs have been certified for such use by the National Fire Information Council.

Federal Statutes that mandate NFIRS use

Excerpt from the Department of Homeland Security’s Program Guidance for the 2004 Assistance to Firefighters Grant Program;

Page 26, Grantees’ Responsibilities, paragraph 8: Agree to provide information, through established reporting channels, to the U.S. Fire Administration’s National Fire Incident Reporting System (NFIRS) for the period covered by the assistance. If a grantee does not currently participate in the incident reporting system and does not have the capacity to report at the time of the award, that grantee must agree to provide information to the system for a twelve-month period commencing as soon as they develop the capacity to report. AFG program grantees from previous years will not be allowed to close out their grants until they demonstrate that they are complying with this requirement. Failure to closeout your previous years’ grants may affect the consideration of future awards.

Excerpt from the Program Guidance for the 2004 Fire Prevention and Safety Grant;

Page 10, Grantees’ Responsibilities, paragraph 7: If applicant is a fire department they must agree to provide information, through established reporting channels to the U.S. Fire Administration’s National Fire Incident Reporting System (NFIRS) for the period covered by the assistance. If a fire department does not currently participate in the incident reporting system and does not have the capacity to report at the time of the award, that grantee must agree to provide information to the system for a twelve-month period commencing as soon as they develop the capacity to report.

NFIRS – Deadlines, Commitments and Other Items

Deadlines

All NFIRS reports should be submitted NLT the first Friday following the end of a month. If that day is a holiday, then the following Monday is the deadline.

Send all NFIRS Files to the NFIRS mailbox at: NFIRS@dps.state.nv.us

Send all files in a “.txt” format as the state system will not allow “.zip” files through their email system.

Commitments

The NFIRS Program Office is available Monday through Friday 8:00 am – 5:00 pm, except Federal and State Holidays.

All data submitted will be transferred to the USFA in a timely manner and will be included in the National Database each year.

Statistical data requests will be handled as quickly as possible for all fire agencies. Please plan ahead and get your request in as soon as possible so we have the maximum amount of time to work your very important request.

Each year this Annual NFIRS Report will be published and circulated throughout the state NLT April of each year for the previous 12-month period. The cut-off for the previous year’s data is the last day of February.

Training, NFIRS Client software installation and all support by the State NFIRS Program Office is provided free of charge to any and all fire departments and their employees. Please call the NFIRS Program Officer to set-up training and installation at: (775) 684-7526.

Other Items

The NFIRS Program Office is constantly pursuing any and all options to make reporting easy and painless as possible at all levels. We are working to rid the state of the dozen or so different reporting methods currently in use, and trying to make a one-program-fits all system available.

This is definitely a difficult undertaking and we are listening to everyone’s concerns with the current methods versus the new programs available out there today. Please forward any and all comments you may have on making the NFIRS reporting system better for all of Nevada’s firefighting elite!

Send your questions and comments to: dbrennan@dps.state.nv.us

Places of Fire Origin in Residential Structures

In 2004, the most common place in a home for a fire to start continues to be the Kitchen. There were 342 kitchen fires, which equal 31.8% of the total residential fires reported. The second leading area was the bedroom with 135 fires. The remaining top three locations included the patio/porch with 94 fires, the garage with 85 fires and the bathroom with 66 fires. These top five categories represent 67.2% of all reported residential fires statewide for 2004. The top three items contributing most to the start of the fires were electrical appliances, heating/air conditioners and water heaters.

Some Final Thoughts and the Future of NFIRS in Nevada

Once again, I would like to thank all those who assisted me in my journey to bring a more complete and informative NFIRS annual to the State of Nevada. I truly believe that Nevada firefighters are moving in the right direction by submitting their valuable data to this office ultimately ensuring fire prevention is in the forefront of this state.

The future of NFIRS for Nevada depends on continued funding and increasing submission of fire data. During this year's legislative session, I am fighting to get a program through that will allow all of Nevada's reportable fire departments to report to **ONE** centralized web-based system. This is a very large undertaking and has taken considerable time and effort from this office, and the vendor, to get a program with the ability to ensure a painless and easy way of reporting for all.

What does this mean for you, the fire department? First of all this program will be **FREE** to you. It will be web-based with no programs or updates to install on your computers. Second, you will access and enter your data with one password on your own web-site and have 24/7 access from any computer worldwide with internet capability (even with dial-up). Lastly, for the first time in any state, this office will have a module to look at all departments data and assist with problems they may have with NFIRS. This will be a valuable tool all the way from the Governor to your grants analysts. Additional modules from the vendor will be available at discounted rates to all participating departments; of course you will pay for these. More information will be available if we get the program passed, probably around late May or early June.

I have enjoyed working with all the fire departments, cities, state offices and their employees, and look forward to a very prosperous 2005! Thank you.
