March 26, 2007

Dear Nevada Fire Service Partners:

I want to thank each of the 161 reporting Fire Agencies that submitted incident response data which was compiled for the State Fire Marshal's 2006 Annual Statistics Report. The information available through the National Fire Incident Reporting System (NFIRS) enables the Nevada Fire Services to demonstrate their public safety services being delivered throughout our State every day.

The NFIRS data being submitted to the State Fire Marshal Division plays a key role in identifying the true fire and other emergency response demands, not only in Nevada, but across our Nation. As a contributing agency, you can be assured your incident data is making a difference in the areas of building and fire codes, product safety, public education programs, and fire service training.

As the new Director of the Nevada Department of Public Safety, I commend all Nevada Fire Services for the outstanding job each and every one of you do on a daily basis to ensure our great State is as fire safe as possible.

Sincerely,

Phil Galeoto Director

Phillip A. Galeoto

Director

James M. Wright
State Fire Marshal

#### Division of the State Fire Marshal

Stewart Facility 107 Jacobsen Way Carson City, NV 89711 (775) 684-7500 ● Fax (775) 684-7518

Dear Nevada Fire Services Associates:

I am pleased to present to you the Nevada State Fire Marshal 2006 Annual Fire and Incident Response Statistics Report derived from the information data your departments entered into the Nevada/National Fire Incident Reporting System (NFIRS).

The goal of the Nevada/National Fire Incident Reporting System (NFIRS) is to encourage the use of a standardized incident reporting system as a means of addressing the State's fire problem and related emergency service issues. Through its use, NFIRS can play a major role in reducing injuries, fatalities and economic losses from fires and related emergencies by facilitating the collection, compilation, analysis, and use of data to produce and disseminate valuable statistics needed by decision makers.

Perhaps the most fundamental use of NFIRS is an understanding of the nature of the fire problem, whether conceived at the local, state, or national level. This information that is gathered from local fire departments provides a resource of statistical data that can then be shared statewide to assist local fire chiefs in determining fire trends and specific areas of fire losses that may need to be addressed. The application of NFIRS provides the critical link to the data collection sharing.

I am experienced with, know and understand the value of, incident reporting data. I also know it is only as good as the information that is or is not accurately reported. I urge each reporting entity to implement an incident report review process within your agency to ensure consistent, accurate, complete and timely documentation with the NFIRS standard. It is imperative that the report information entered into your agency's NFIRS software is reflective of actual incident activity.

We should be proud of the 85.7% reporting performance success recognition that everyone has helped Nevada to achieve. We will continue to encourage and assist those fire departments who are not currently participating in NFIRS to be able, in the future, to enable us to ultimately capture and accurately submit all of the response data we can to give us a true and complete picture of Nevada's fire service demands.

The State Fire Marshal Division is dedicated to providing the Nevada Fire Service our support and services to the best of our ability. Collectively, we can make a difference in protecting life and property from fire and other related emergencies.

Yours truly in Fire Safety,

James M. Wright, Chief

Nevada State Fire Marshal Division

## Some Words from the Nevada NFIRS Program Officer

For the third straight year Nevada Fire Departments have increased their NFIRS reporting efforts from 83.8% in 2005 to 85.7% for 2006! We are still gaining momentum going into the 2007 reporting year as two more departments are already working on preparing for reporting. Great Job!

This year we have seen a significant drop in federal grant dollars that were awarded to Nevada Fire Departments (\$857,452.00) compared to 2005. We hope all departments are utilizing the Assistance to Firefighters Grant Program for all of the hard work your doing collecting your statistics and data throughout the year.

The State Fire Marshal office had some major challenges in 2006, with the departure of the Fire Marshal and the Assistant Fire Marshal and then losing our bid to get a web-based NFIRS application out to the departments. Since then we are rebounding and have been working diligently to come up with solutions to assist departments in reporting NFIRS to the state and federal levels. Our new State Fire Marshal and Assistant Fire Marshal have been appointed and they are both very well versed in NFIRS and what these statistics can do for the Fire Service. Also, I have built an NFIRS installation and training packet that can be sent via regular mail to assist all departments that wish to begin reporting or need additional instruction. Finally, I plan to once again move forward with the plan of getting a web-based NFIRS system out to the departments.

Our main goal for the 2007 reporting year is to collect complete NFIRS reports and to turn our focus on the data input into the system. Upon our review of the data submitted we have found numerous reports that were submitted incomplete and lacking all of the needed data elements to properly assess the fire issues for Nevada. Just following the prompts in the system to get the basic report in is not enough. We must push for complete data input into the database so we can extract a picture of the fire dangers that pose a threat to Nevada and its citizens. Just because something is not a mandatory field in the system means you should skip inputting the data into it. Make your data count and do the extra fields to capture the true picture of what you and your department did while responding. During my travels throughout Nevada doing NFIRS training the number one thing that is said by most departments is that the "citizens and council members don't know what we do and they don't see the hard work we put into our jobs as first responders therefore other entities like the police, sheriff, hospital EMS and many others get funded before we do". Here is your opportunity to do something about it.......REPORT WHAT YOU DID IN NFIRS!

This is where they get their information and is the reflection of what your department does throughout the year. It is your tool to getting those needed funds and new hires for your department.

Thank you all for your participation and hard work.

Danny M. Brennan Nevada State Fire Marshal Office Fire Data Officer, Agency Program Information Specialist Nevada NFIRS Program Manager

## Nevada National Fire Incident Reporting System (NFIRS) State Statutes

#### State of Nevada Statutes that mandate National Fire Incident Reporting System (NFIRS) use

NRS 477.030, Duties; powers (State Fire Marshal), paragraph 7

The State Fire Marshal shall put the National Fire Incident Reporting System into effect throughout the state and publish at least annually a summary of data collected under the system.

NAC 477.905 National Fire Incident Reporting System: Reporting requirements. (NRS 477.030)

For the purposes of the National Fire Incident Reporting System to be put into effect throughout this state as required by NRS 477.030:

- 1. All local fire jurisdictions in this state shall report to the State Fire Marshal such statistics and data required to publish a summary of fire incident information that is compatible with the National Fire Incident Reporting System. Any fire service within this state may obtain a copy of the annual report from the State Fire Marshal at no charge.
- 2. The State Fire Marshal will report the statistics, which he/she collects pursuant to this section to the National Fire Information Council semiannually. Because the State of Nevada has been designated as an "all-incident reporting state," local fire jurisdictions shall report their statistics in a timely manner and in accordance with reporting deadlines established by the State Fire Marshal. (\*\*Note: See page 4 of this report for deadlines).
- 3. A local fire jurisdiction that is facing technical difficulties in providing information pursuant to this section will receive assistance from the State Program Manager for the National Fire Incident Reporting System within the State Fire Marshal division.
- 4. A local fire jurisdiction may use computer-aided programs in reporting its information if the programs have been certified for such use by the National Fire Information Council.

### NFIRS – Deadlines, Commitments and Other Items

#### **Deadlines**

All NFIRS reports should be submitted *NO LATER THAN* the first Friday following the end of a month. If that day is a holiday, then the following Monday is the deadline.

The cut-off for the previous year's data is the last day of February.

Send all NFIRS Files to the NFIRS mailbox at: NFIRS@dps.state.nv.us

Send all files in a ".txt" format as the state system will not allow ".zip" files through their email system.

#### **Commitments**

The NFIRS Program Office is available Monday through Friday 7:30 am -4:30 pm (during the winter season, October through April) and Monday through Thursday 6:00 am -4:30 pm (during the summer season, May through September), except Federal and State Holidays.

All data submitted will be transferred to the USFA in a timely manner and will be included in the National Database each year.

Statistical data requests will be handled as quickly as possible for all fire agencies. Please plan ahead and submit your request in as soon as possible so we have the maximum amount of time to work your request so we can provide you a quality response.

The annual NFIRS Report will be published and circulated throughout the state during April of each year for the previous 12-month period.

Training, NFIRS Client software installation and all support by the State NFIRS Program Office is provided free of charge to any and all fire departments and their employees. Please call the NFIRS Program Officer to receive the training and installation packet at: (775) 684-7526.

#### **Other Items**

The NFIRS Program Office is constantly pursuing any and all options to make reporting user friendly as possible at all levels.

This is definitely a difficult undertaking and we are listening to everyone's concerns with the current methods versus the new programs available out there today. Please forward any and all comments you may have on making the NFIRS reporting system better for all of Nevada's firefighting elite!

Send your questions and comments to: <a href="mailto:dbrennan@dps.state.nv.us">dbrennan@dps.state.nv.us</a>

Vacant structural area	15	0.36%
Undetermined	406	9.70%

## Did you know?

- 21.28% of all fires started in Nevada began in an engine, gear or wheel area.

- A male is involved 72.41% of the time in a fire.

- 34.32% of the time the fire is cause unintentionally and is caused 40.00% of the time by an undetermined heat source.

- 29.23% it is undetermined the item that first ignited in a fire.

 Only 46.51% of the time were detectors present, when they were present they alerted the occupant 72.69% of the time. Most of these detectors were smoke only at 63.99% with 34.92% being hardwired with a battery back-up.

- In larger buildings an Automatic Extinguisher System was installed only 11.49% of the time. Those that have the system installed mainly had a wet pipe sprinkler 63.49% and it was effective 34.13% of the time. The main reason for the low effectiveness was the system was not installed in the area containing the fire 38.46%.

#### Fire - Causes of

Causes of Ignition		
Code Descriptor	<u>Frequency</u>	Percent

## **Places of Fire Origin in Residential Structures**

In 2006, the most common place in a home for a fire to start continues to be the Kitchen for the forth year in a row with 31.6% of all residential fires. The second leading area was the bedroom 15.7% with the remaining top locations including the garage/storage areas10.6%, balcony/porch 9.3% and the bathroom with 9.1%. These top five categories represent 76.2% of all reported residential fires statewide for 2006 with the rest spread out over many other items throughout a household. The top three items contributing most to the start of the fires were stoves/ranges, fans and electrical wiring. The number one heat source causing the fires was from powered equipment which igniting electrical wire or cable insulation the most of any other item in these types of fires.

## Did you know?

- Males are 62.50% more likely to be injured in a fire than females.

- Thankfully most injuries in a fire are minor at 54.55% with the majority of the victims suffering from smoke inhalation 36.84%.

- When an injury does occurr the hands, arms or fingers tend to be the most injured at 21.57%.

- Most victims were trying to do fire control when injured 31.03% and most were in the area where the fire started when injured 64.71%.

#### Did you know?

- Most wildland fires occur during clear weather with less than 1/10 cloud cover 66.67%.

 Annual grasses account for 40.82% of the wildland burned with the fire danger rating usually in the high to extereme fire danger rating 55.6%.

- The majority of all wildland fires 36.22% started in open land or a field and usually at the bottom of a valley 43.75%.

- 32.07% of the time the heat source is undetermined and 49.96% of the time the cause of the fire is also undetermined.

- Males set wildland fires 93.10% of the time.

- Usually the property is owned by a private tax paying citizen 48.15%.

- 40.43% of the time an unknown person caused the fire through unknown human activities at 40.00%.

### **Federal Assistance to Firefighters Grant Program**

#### Federal mandate that requires NFIRS use

Excerpt from the Department of Homeland Security's Program Guidance for the Assistance to Firefighters Grant Program;

<u>Page 26, Grantees' Responsibilities, paragraph 8:</u> Agree to provide information, through established reporting channels, to the U.S. Fire Administration's National Fire Incident Reporting System (NFIRS) for the period covered by the assistance. If a grantee does not currently participate in the incident reporting system and does not have the capacity to report at the time of the award, that grantee must agree to provide information to the system for a twelve-month period commencing as soon as they develop the capacity to report. AFG program grantees from previous years will not be allowed to close out their grants until they demonstrate that they are complying with this requirement. Failure to closeout your previous years' grants may affect the consideration of future awards.

Excerpt from the Program Guidance for the Fire Prevention and Safety Grant;

<u>Page 10, Grantees' Responsibilities, paragraph 7:</u> If applicant is a fire department they must agree to provide information, through established reporting channels to the U.S. Fire Administration's National Fire Incident Reporting System (NFIRS) for the period covered by the assistance. If a fire department does not currently participate in the incident reporting system and does not have the capacity to report at the time of the award, that grantee must agree to provide information to the system for a twelve-month period commencing as soon as they develop the capacity to report.

The purpose of the Assistance to Firefighters Grant (AFG) Program is to award one-year grants directly to fire departments and nonaffiliated emergency medical services (EMS) organizations of a State to enhance their abilities with respect to fire and fire-related hazards. Our primary goal is to provide assistance to meet fire departments' and nonaffiliated EMS organizations' firefighting and emergency response needs. This program seeks to support organizations that lack the tools and resources necessary to protect the health and safety of the public and their emergency response personnel with respect to fire and all other hazards they may face.
